EXECUTIVE SUMMARY

Acme Refining Scrap Iron and Metal Co. Inc. was sold to Chemisphere Incor. known as ZYX Corp. on October 1, 1982.

This site is designated as the primary storage, transfer, processing and recovery area for metals, oil, solvent and hazardous waste.

The permit states that the waste is to be stored in 55 gallon drums. The past inspection reports state that there are piles of scrap metal scattered throughout this 104' x 120' area which is surrounded by a chain link fence.

This site has been used in the past as a non-permitted storage area for wastes generated off-site.

I recommend that the F.I.T. contractor take soil samples in and around the site for possible migration of any hazardous waste that could have leaked in and around the area over the past.
